

UF110plus

Precise drying, heating, ageing, burn-in and hardening in research, science, industry and quality assurance.

The universally applicable lab oven U is Memmert's classic appliance for temperature control in science, research and material tests in industry. The technologically perfected masterpiece made of high-quality, hygienic, easy-to-clean stainless steel leaves nothing to be desired in terms of ventilation and control technology, overtemperature protection and precisely tuned heating technology.

On this page, you can find all the essential technical data on the universal Memmert lab oven. Our customer relations team will be pleased to help if you want further information. If you should require a customised special solution, please contact our technical specialists at sales@memmert.com.

Temperature			
Working temperature range	at least 5 (UN/UNplus/UNm/UNmplus) or 10 (UF/UFplus/UFm/UFmplus) above ambient temperatur to +300 $^{\circ}\text{C}$		
Setting accuracy temperature	up to 99.9 °C: 0.1 / from 100 °C: 0.5		
Setting temperature range	+20 to +300 °C		
Temperature sensor	2 Pt100 sensors DIN Class A in 4-wire-circuit for mutual monitoring, taking over functions in case of an error		
Control technology			
ControlCOCKPIT	TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays.		
Language setting	German, English, Spanish, French, Polish, Czech, Hungarian		
Timer	Digital backwards counter with target time setting, adjustable from 1 minute to 99 days		
Function HeatBALANCE	adapting the distribution of the heating performance of the upper and lower heating circuit from -50 $\%$ to +50 $\%$		
Function SetpointWAIT	the process time does not start until the set temperature is reached		
Calibration	three freely selectable temperature values		
ound and a	temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones,		
adjustable parameters Ventilation	temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime		
adjustable parameters			
adjustable parameters Ventilation	summertime/wintertime		
adjustable parameters Ventilation Fan	forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually		
adjustable parameters Ventilation Fan Fresh air	forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Admixture of pre-heated fresh air by electronically adjustable air flap		
adjustable parameters Ventilation Fan Fresh air	forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Admixture of pre-heated fresh air by electronically adjustable air flap		
Ventilation Fan Fresh air	forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Admixture of pre-heated fresh air by electronically adjustable air flap		
Ventilation Fan Fresh air Vent Communication	forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Admixture of pre-heated fresh air by electronically adjustable air flap vent connection with restrictor flap		
Ventilation Fan Fresh air Vent Communication Documentation	forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Admixture of pre-heated fresh air by electronically adjustable air flap vent connection with restrictor flap programme stored in case of power failure AtmoCONTROL software on a USB stick for programming, managing and transferring programmes		
Ventilation Fan Fresh air Vent Communication Documentation	forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Admixture of pre-heated fresh air by electronically adjustable air flap vent connection with restrictor flap programme stored in case of power failure AtmoCONTROL software on a USB stick for programming, managing and transferring programmes		
Ventilation Fan Fresh air Vent Communication Documentation Programming	forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Admixture of pre-heated fresh air by electronically adjustable air flap vent connection with restrictor flap programme stored in case of power failure AtmoCONTROL software on a USB stick for programming, managing and transferring programmes		
Ventilation Fan Fresh air Vent Communication Documentation Programming Safety	forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Admixture of pre-heated fresh air by electronically adjustable air flap vent connection with restrictor flap programme stored in case of power failure AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating		
Ventilation Fan Fresh air Vent Communication Documentation Programming Safety Temperature control	forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Admixture of pre-heated fresh air by electronically adjustable air flap vent connection with restrictor flap programme stored in case of power failure AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection		
Adjustable parameters Ventilation Fan Fresh air Vent Communication Documentation Programming Safety Temperature control	forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Admixture of pre-heated fresh air by electronically adjustable air flap vent connection with restrictor flap programme stored in case of power failure AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off		

Standard equipment

Works calibration certificate	Calibration at +160°C
Door	fully insulated stainless steel door with 2-point locking (compression door lock)
Internals	2 stainless steel grid(s), electropolished

Stainless steel interior

Dimensions	w _(A) x h _(B) x d _(C) : 560 x 480 x 400 mm (d less 39 mm for fan)		
Interior	easy-to-clean interior,made of stainless steel, reinforced by deep drawn ribbing with integrated and protected large-area heating on four sides		
Volume	108		
Max. number of internals	5		
Max. loading of chamber	175 kg		
Max. loading per internal	20 kg		

Textured stainless steel casing

Dimensions	$w_{(D)} \times h_{(E)} \times d_{(F)}$: 745 x 864 x 584 mm (d +56mm door handle)
Housing	rear zinc-plated steel

Electrical data

Voltage Electrical load	230 V, 50/60 Hz approx. 2800 W	
Voltage Electrical load	115 V, 50/60 Hz approx. 1800 W	

Ambient conditions

Set Up	The distance between the wall and the rear of the appliance must be at least 15 cm. The clearance from the ceiling must not be less than 20 cm and the side clearance from walls or nearby appliances must not be less than 5 cm.
Altitude of installation	max. 2,000 m above sea level
Ambient temperature	+5 °C to +40 °C
Humidity rh	max. 80 %, non-condensing
Overvoltage category	II .
Pollution degree	2

Packing/shipping data

Transport information	The appliances must be transported upright
Customs tariff number	8419 8998
Country of origin	Federal Republic of Germany
WEEE-RegNo.	DE 66812464
Dimensions approx incl. carton	w x h x d: 830 x 1050 x 800 mm
Net weight	approx. 74 kg
Gross weight carton	approx. 99 kg

Standard units are safety-approved and bear the test marks

LABORATORY EQUIPMENT MAINTENANCE, REPAIR, CALIBRATION AND SALES

Established in 1987, Henderson Biomedical is the UK's leading laboratory equipment sales and service provider. Our knowledgeable team can provide you with excellent sales advice on a range of different types of laboratory equipment including centrifuges, refrigerators, freezers and heat sealers.

Henderson Biomedical is also able to provide you with first class after-sales service and calibration of your laboratory equipment. We are an **ISO 17025 (UKAS) accredited calibration test laboratory** and our team of Field Service Engineers cover the whole of the United Kingdom.

Please contact us for more information on the types of equipment we supply and the different after-sales services we can offer.

Henderson Biomedical

Unit 3, Swan Close Croydon CRO 2DZ United Kingdom
