

FLAKER, MODULAR FM-150AKE-HC-SB

Product series: FM

Item number: F128-C101

This Hoshizaki FM-150AKE-HC-SB is a self contained flake ice maker producing up to 150 kg of high-quality flake ice per 24 hours.

Hoshizaki FM ice makers generate quality granular ice, such as Flake ice. The light texture of granular ice has a quick cooling effect, creating an environment of uniform temperatures, without causing unpleasant freezer-burn. This is why Hoshizaki Flake ice is highly popular and considered the ideal material to prepare and layer hygienic and attractive food displays.

For flake ice, the extruding head is equipped with wide channels and multi-blade cutters.

Sustainable

The FM-150AKE-HC-SB uses refrigerant R290. This natural refrigerant is not only climate-friendly, but also boosts the machine when it comes to performance and production capacity.

Material

The exterior and the auger are made of stainless steel. The closed water circuit provides maximum protection against any type of contamination during ice production. All Hoshizaki machines are easy to use, clean, and maintain.

Unique Technology

The inner workings of Flakers is designed to prevent unpleasant calcification and bacterial contamination. For example, the use of carbon graphite bushings instead of conventional ball bearings allows the machine to work entirely without grease.

Smart Design

Like all Hoshizaki Ice makers, the FM-150AKE-HC-SB is designed to last and comes with smart design extras, such as the intuitive control display for preventive maintenance.

Perfect Fit

With outside dimensions W x D x H of mm, the FM-150AKE-HC-SB is compact and is a perfect fit for small spaces.

Plug&Play

The smart plug-and-play design guarantees an easy and quick set-up.

SPECIFICATIONS

Product title	Flaker, Modular	CO2 equivalent (kg)	0.33
Production Capacity (kg/24h) approx. (AT 10°C, WT 10°C)	150	Cooling System	Air Cooled
Power supply	1/220 - 240V/50Hz	Product configuration	Modular
Electric Consumption (kW)	0.405	Net weight (kg)	63
Ice type	Flake	Gross Weight Packed (kg)	70
Refrigerant	R290	Corresponding bin(s)	B140SA, B210SA, B340SA

LABORATORY EQUIPMENT MAINTENANCE, REPAIR, CALIBRATION AND SALES

Established in 1987, Henderson Biomedical is the UK's leading laboratory equipment sales and service provider. Our knowledgeable team can provide you with excellent sales advice on a range of different types of laboratory equipment including centrifuges, refrigerators, freezers and heat sealers.

Henderson Biomedical is also able to provide you with first class after-sales service and calibration of your laboratory equipment. We are an **ISO 17025 (UKAS) accredited calibration test laboratory** and our team of Field Service Engineers cover the whole of the United Kingdom.

Please contact us for more information on the types of equipment we supply and the different after-sales services we can offer.
